

# FARM CYBER PROTECTION

## FAMILY AND FARM. TOGETHER.

Specifically designed to uniquely blend the combined personal and commercial exposures associated with Farms. We've taken core elements of our **FAMILY CYBER** program and combined them with a **COMMERCIAL CYBER** program that's designed specifically for farming exposures. Coverage extends to the "Internet of Things": Home connected devices, Cloud based storage, GPS equipment, harvesters, drone guidance systems, planting and seeding systems, application controls, yield monitoring, water management data storage systems, wireless networks for soil testing, and hydration and crop measurement, except as addressed by product warranties.

### COVERAGE PROGRAM DESIGN
